

SETTING A STOREFRONT TAX RATE

Now that we have our taxing authority established in the accounting record, we are going to add one extra feature: We are going to set our tax authority's tax rate such that all the products we sell on the MyOFBiz Ecommerce Company storefront include a sales tax of a fixed 15% charge.

To set this up, navigate to the **Accounting Manager** webpage titled: "The Profile of MyOFBiz Tax Authority [10004]":

- ↳ Navigate to **Accounting Manager** application.
- ↳ Click "Tax Authorities".
- ↳ Find the "MyOFBiz Tax Authority".
- ↳ Click the "Edit" button adjacent to the "MyOFBiz Tax Authority" to bring up the "Edit Tax Authority" webpage.
- ↳ Click the "Product Rates" button.
- ↳ In the "Add Tax Authority Product Category" section of the "Edit Tax Authority Product Rates..." Form, enter the following values:

TAX RATES FOR PRODUCTS	
FIELD	VALUE
Type (drop down selection box)	Sales Tax
Store Id	9000
Tax Percentage	15
Description	MyOFBiz Sales Tax/Value Added Tax
From Date	2011-01-30 20:35:54.756

- ↳ Click the "Add" button to make this effective.

Note: In the 10.4 Release, the "Add Tax Authority Product Category" Screen is ugly. The listing of associated tax authorities per a products scrolls off the screen and is extremely difficult to read, let alone use to update. If you don't like what you see, please comment on the OFBiz User Mailing list.

This step now complete!
